

By Stephan Folkes

Who am I

- I am **Stephan Folkes**
- I am a Technology Consultant, specialising in DevOps
- Based in London, UK
- Experienced using Gerrit in enterprise environments, delivering multi-million pound projects.
- You can find me at linkedin.com/in/stephanfolkes
- Contact me via my instructor profile

Course Prerequisites

- A basic knowledge of Git

Course Objectives

- You will understand what is Gerrit, and how it is used from the perspective of a project administrator or team member using Gerrit.
- You will learn about the code review workflow and how to handle changes.
- You will be able to administer and configure Gerrit projects to suitably manage repositories, access controls and other settings in the enterprise.
- You will learn how to handle different scenarios in Gerrit, from pushing code through to code reviews.

Introduction to Gerrit

- What is Gerrit?
- Why use Gerrit?
- What is a code review?
- Gerrit Terminology

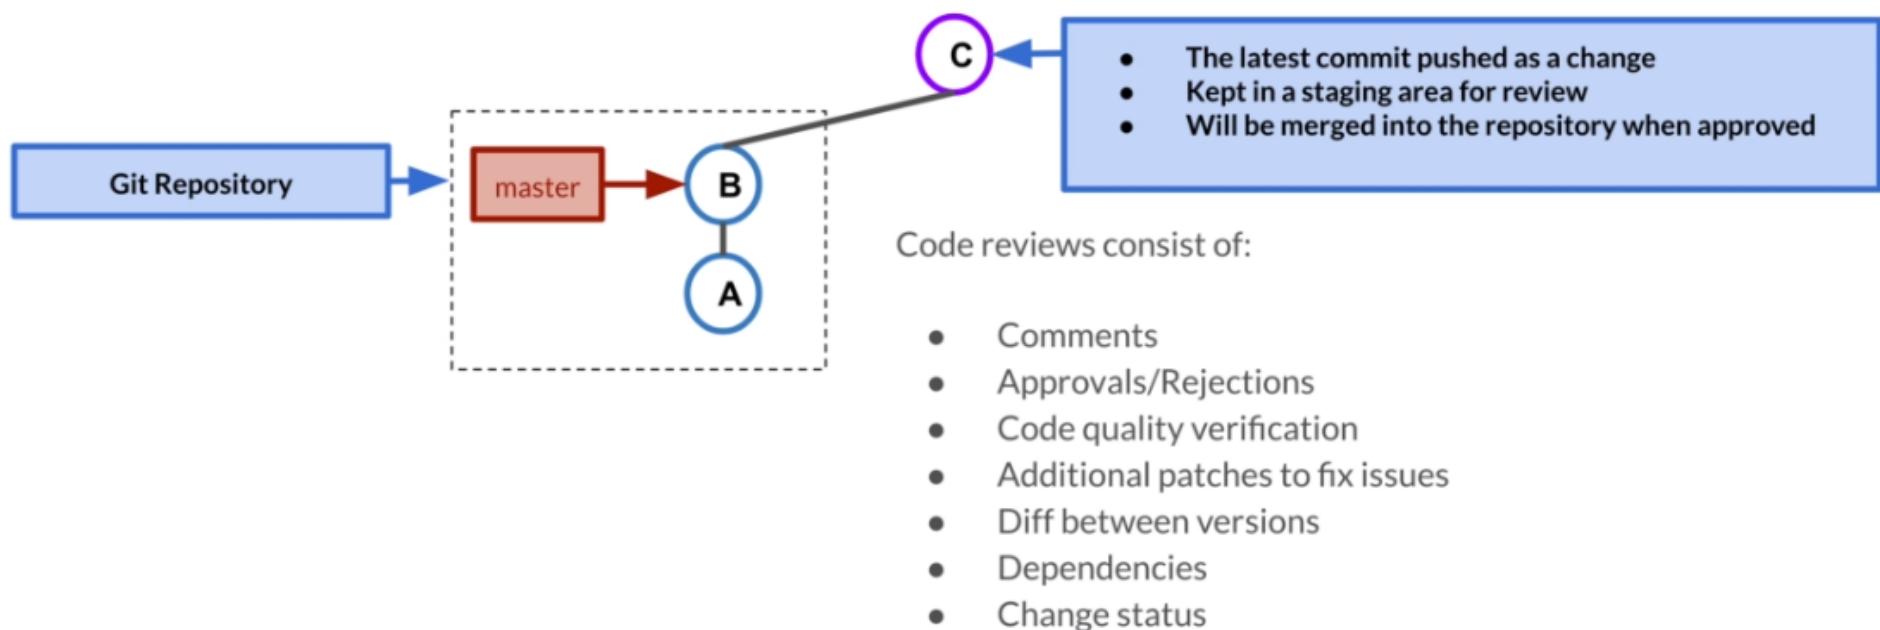

What is Gerrit?

- Gerrit is a source code management (SCM) platform, just like GitHub, BitBucket, or Team Foundation Server
 - It can manage multiple repositories, branches, tags, and other Git resources.
- Gerrit's version control system is Git.
- Provides **code review** and **access control** on Git repositories.
 - Stores changes before they are committed to repository branches.
- Open source development and used by Google to develop Android operating system.
Available to download for free.

Why use Gerrit?

- Provides a lightweight framework for reviewing commits before they are accepted into the Git repository.
- Captures the team discussion on code changes through change reviews, and is persistent and auditable.
- Control team workflows to ensure all code changes go through quality assurance checks.
- Manages access controls for Git repositories, and its web-based interface.
- Developers don't need any additional tools to interact with Gerrit.

What is a code review?

Gerrit Terminology

- **Change:** A change represents a single commit that is under review. Each change is identified with a Change-Id.
- **Patchset:** Patchsets are subsequent commits that are attempts to amend an existing change.

The screenshot shows the Gerrit Code Review web interface for the 'example-repository'. The left sidebar contains links for 'Repositories' (selected), 'Access', 'Commands', 'Branches' (selected), 'Tags', 'Dashboards', 'Groups', and 'Plugins'. The main content area displays a table of branches. The table has columns for 'Name' and 'Revision'. It lists four entries: 'HEAD' (revision master, edit link), 'nefs/meta/config' (revision cb66a135f1fb73de561364d520022aa6fec1c41f, browse link), 'example-feature' (revision 226d99f622d8646be9721e38c3c28c46d2e86e20, browse link), and 'master' (revision 226d99f622d8646be9721e38c3c28c46d2e86e20, browse link). A 'CREATE NEW' button is visible at the top right of the table. At the bottom, it says 'Page 1'.

The screenshot shows the Gerrit Code Review web interface for managing a repository named 'example-repository'. The user is navigating through the 'Tags' section. A modal dialog box titled 'Create Tag' is open, prompting the user to enter a tag name ('0.1'), an initial revision ('example-feature'), and an optional annotation. The 'CREATE' button in the dialog is highlighted with a mouse cursor. The background shows a table of existing tags with columns for Name, Revision, Message, Tagger, and Repository Browser. The Gerrit navigation bar at the top includes links for CHANGES, YOUR, DOCUMENTATION, and BROWSE, along with a search bar and various configuration icons.

Access Controls

Entry	Description	Examples
Reference	Represents the object assigned.	refs/heads/master refs/heads/* ^refs/heads/[a-z]
Access Category	WHAT can or cannot be done.	Owner, Push, Read, Submit, etc...
Exclusive	Is the permission exclusive for only this reference and user/group?	True or False
User/Group and Access Rule	WHO and what rule is assigned.	devTeamGroup - ALLOW approvalGroup - DENY

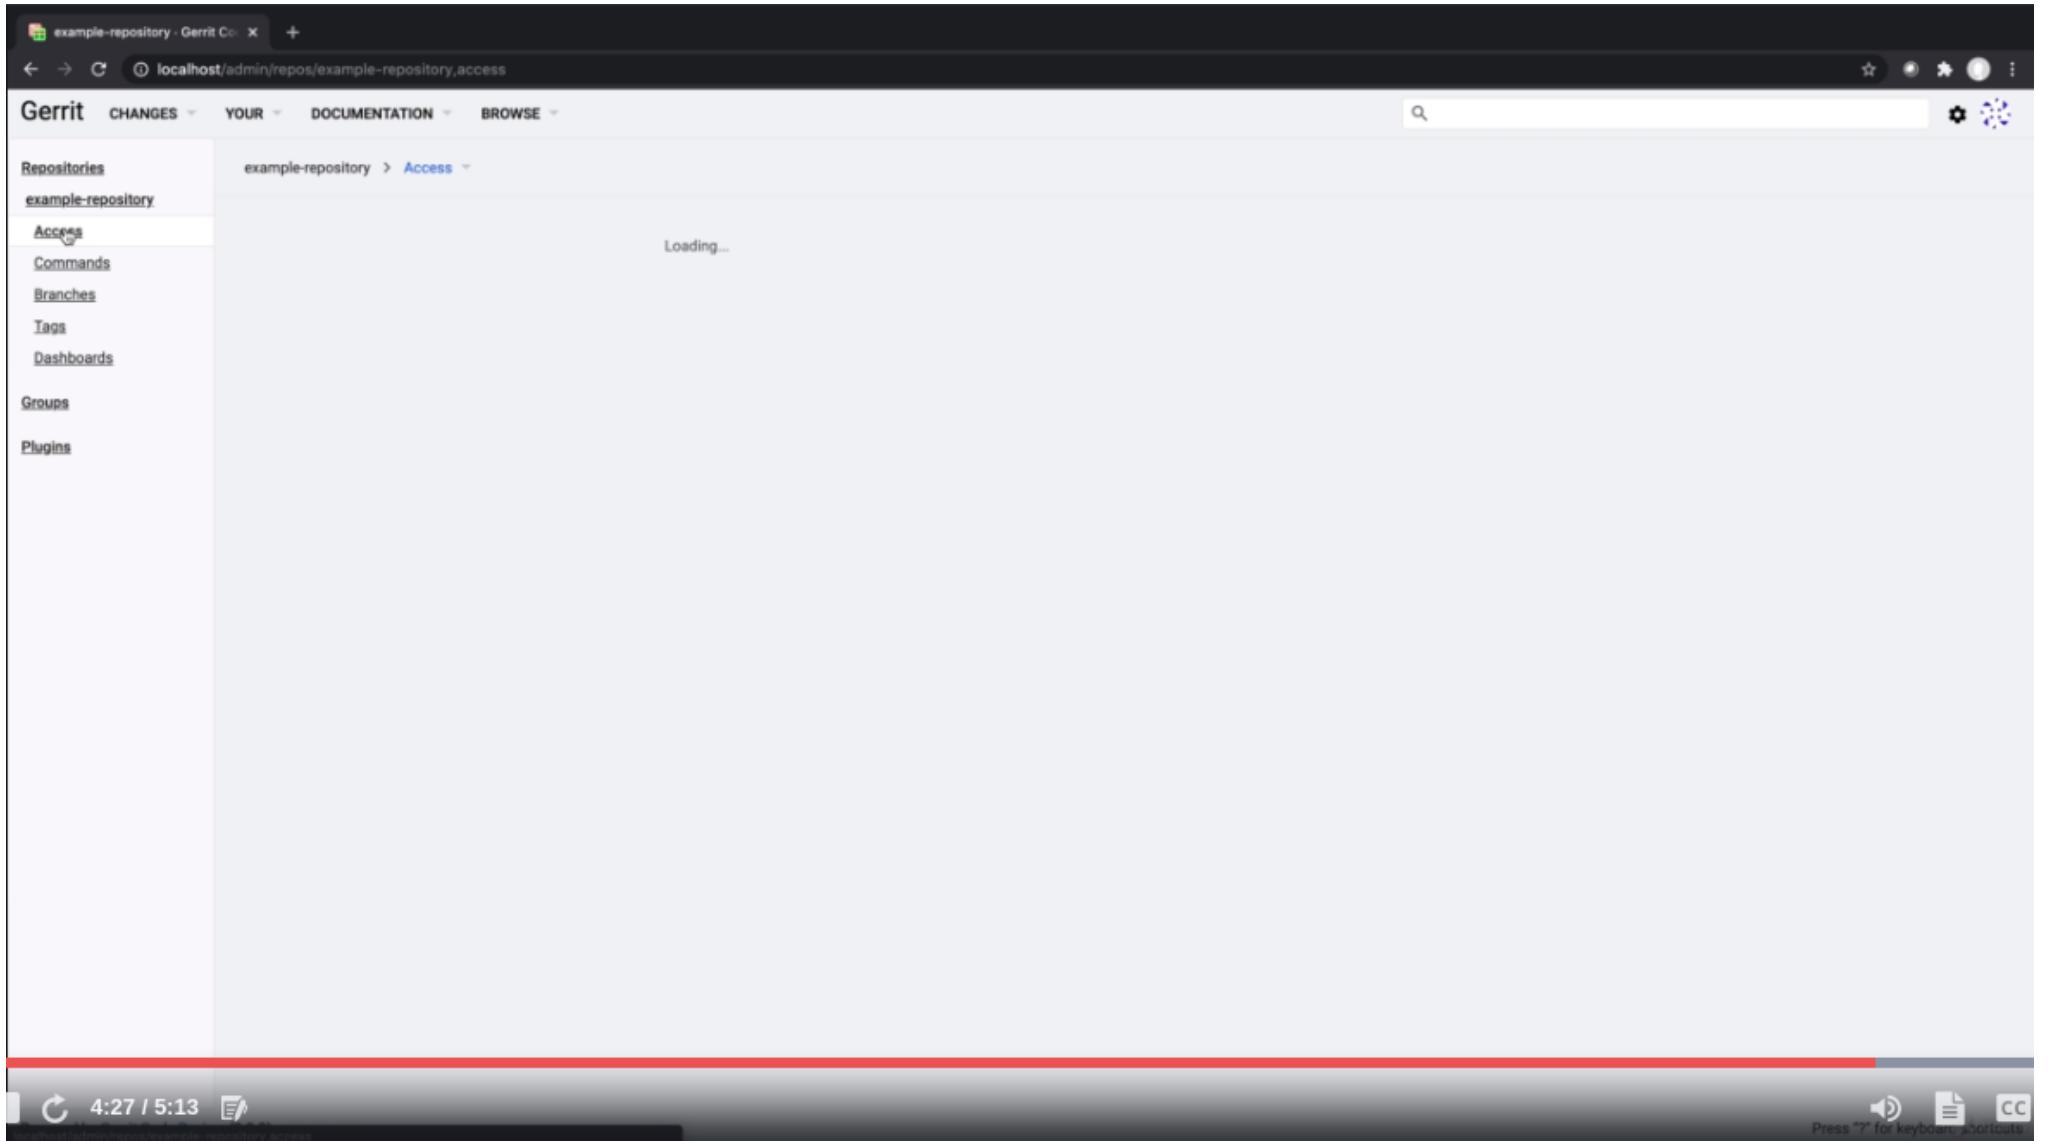

References

<code>refs/*</code>	All references in the project. Use this to assign permissions to the entire project.
<code>refs/for/*</code> <code>refs/for/refs/heads/*</code>	Reference to push changes and patchsets to change review for a particular destination branch
<code>refs/changes/*</code>	Reference for code review changes and patchsets
<code>refs/heads/*</code>	Reference for git branches
<code>refs/tags/*</code>	Reference for git tags
<code>refs/meta/config</code>	Where Gerrit configuration per project resides

The screenshot shows the Gerrit Code Review web interface. The main content area is titled 'Access' for the 'example-repository'. It displays a list of access rights. At the top right of the main content area, there are three buttons: 'CANCEL', 'SAVE', and 'SAVE FOR REVIEW'. Below these buttons, there are two sections: 'Reference: refs/*' and 'Owner'. Under 'Reference: refs/*', there is a single entry 'ALLOW user/Stephan.Folkes (sfolkes)'. Under 'Owner', there is also a single entry 'ALLOW user/Stephan.Folkes (sfolkes)'. Below these sections, there is a link 'Add group' and a section for adding permissions. This section contains a dropdown menu 'Add permission: Label Code-Review' and an 'ADD' button. Below this, there is another section for 'refs/heads/master' with a 'REMOVE' button. Underneath it, there is a 'Push' section with an 'EXCLUSIVE' toggle button, which is currently turned off (indicated by a grey circle). This section also has an 'ALLOW' dropdown set to 'Example-Group', a dropdown for 'Allow pushing (but not force pushing)', and a 'REMOVE' button. Below this, there is a section for 'Example-Group' with an 'ADD' button. At the bottom of the main content area, there is a button 'ADD REFERENCE'. The left sidebar contains links for 'Repositories', 'Access' (which is currently selected), 'Commands', 'Branches', 'Tags', 'Dashboards', 'Groups', and 'Plugins'. The bottom of the screen shows a dark footer bar with a timer '5:01 / 5:13', a link 'Powered by Gerrit Code Review (3.2.3)', and a message 'Press "?" for keyboard shortcuts'. On the far right of the footer, there are icons for volume, file, and CC.

Pushing Code to Gerrit

Commit-msg hook

Push code to Git Branches

Push code for Gerrit code review

Pushing patchset revisions

Commit-msg hook

- The commit-msg hook is a shell script automatically invoked on git commits.
- It must be pulled and placed in the local git repository for each fresh git clone.
- It will insert a globally unique Change-ID into the footer of the commit message.
- Gerrit uses this Change-ID tag to track commits across cherry-picks and rebases.

,

Commit-msg hook - Extra Tips

Git config properties can change the behaviour of this commit hook.

If `gerrit.createChangeId` is set to `false`. Then the Change-ID will not be added to the commit message.

If `gerrit.reviewUrl` is set to the base URL of your Gerrit server. Then `Link` message will be added to the footer of the commit message instead of Change-ID. The value of link will reflect a URL that will take you to the review page for this change. (e.g. `gerrit.reviewUrl = https://gerrit-code-review.demo.com/`)

Push code to Git branch references

Despite code review being a major use case for Gerrit. You may not want to code review all pushes or merges to every branch. There still is the possibility to perform a regular push into a Git branch.

Examples:

- `git push`
- `git push origin HEAD:<branch-name>`
- `git push origin HEAD:refs/heads/<branch-name>`

```
Gerrit $git clone "ssh://sfolkes@localhost:29418/push-to-gerrit"

Added a new file - code-review.txt

Change-Id: [Ia4ce5066a8fff619f24bc7f748d5dc0ecf12e03612](#)

[code-review.txt](#) [Added - diff]
1 file changed
[tree: e22b8c0aa039cb414a6979cea3782365726addd9](#)

[code-review.txt](#)

Powered by [Gitles](#)

[txt](#) [json](#) [history](#)

A screenshot of a web browser window displaying a Gitiles interface. The address bar shows the URL `localhost/plugins/gitiles/push-to-gerrit/+refs/heads/dev/code-review.txt`. The page title is "code-review.txt - push-to-gerrit". The top navigation bar includes links for "Code Review", "Stephan Folkes", and "Sign Out". On the left, there's a "Gitiles" sidebar. The main content area displays the file content:

```
localhost / push-to-gerrit / refs/heads/dev / , / code-review.txt

blob: 93f49a16ce2525c78825de2c3041ff165f0a6468 [file] [log] [blame]

1 Demo Gerrit Push
```

The file contains a single line of text: "1 Demo Gerrit Push". Below the file content, there are download links for "txt", "json", and "atom". At the bottom left, it says "Powered by [Gitiles](#)".

1 Demo Gerrit Push
```

The file contains a single line of text: "Demo Gerrit Push". At the bottom right of the content area, there are download links for "txt", "json", and "atom".

Push code for code review

Pushing for code review opens a new change revision screen on the Gerrit UI. Enabling team members to view the change, review, make comments, patchset changes and vote.

Examples:

- `git push origin HEAD:refs/for/<branch-name>`
- `git push origin HEAD:refs/for/refs/heads/<branch-name>`

Demo Gerrit Push for code review

Push patchsets to existing code reviews

When a code review is opened the first patchset is submitted. The code can then be tweaked until it is deemed ready for approval and merging. Patchset changes may also be required to resolve merge conflicts.

```
git fetch https://<Gerrit-Server>/<project> refs/changes/12/34567/8  
git checkout FETCH_HEAD  
git add <path-of-reworked-file>  
git commit --amend  
git push origin HEAD:refs/for/<branch-name>

Press "?" for keyboard shortcuts

```
|push-to-gerrit $git fetch "ssh://sfolkes@localhost:29418/push-to-gerrit" refs/changes/06/6/1 && git checkout FETCH_HEAD
|From ssh://localhost:29418/push-to-gerrit
| * branch            refs/changes/06/6/1 -> FETCH_HEAD
|Note: switching to 'FETCH_HEAD'.
```

You are in 'detached HEAD' state. You can look around, make experimental changes and commit them, and you can discard any commits you make in this state without impacting any branches by switching back to a branch.

If you want to create a new branch to retain commits you create, you may do so (now or later) by using -c with the switch command. Example:

```
git switch -c <new-branch-name>
```

Or undo this operation with:

```
git switch -
```

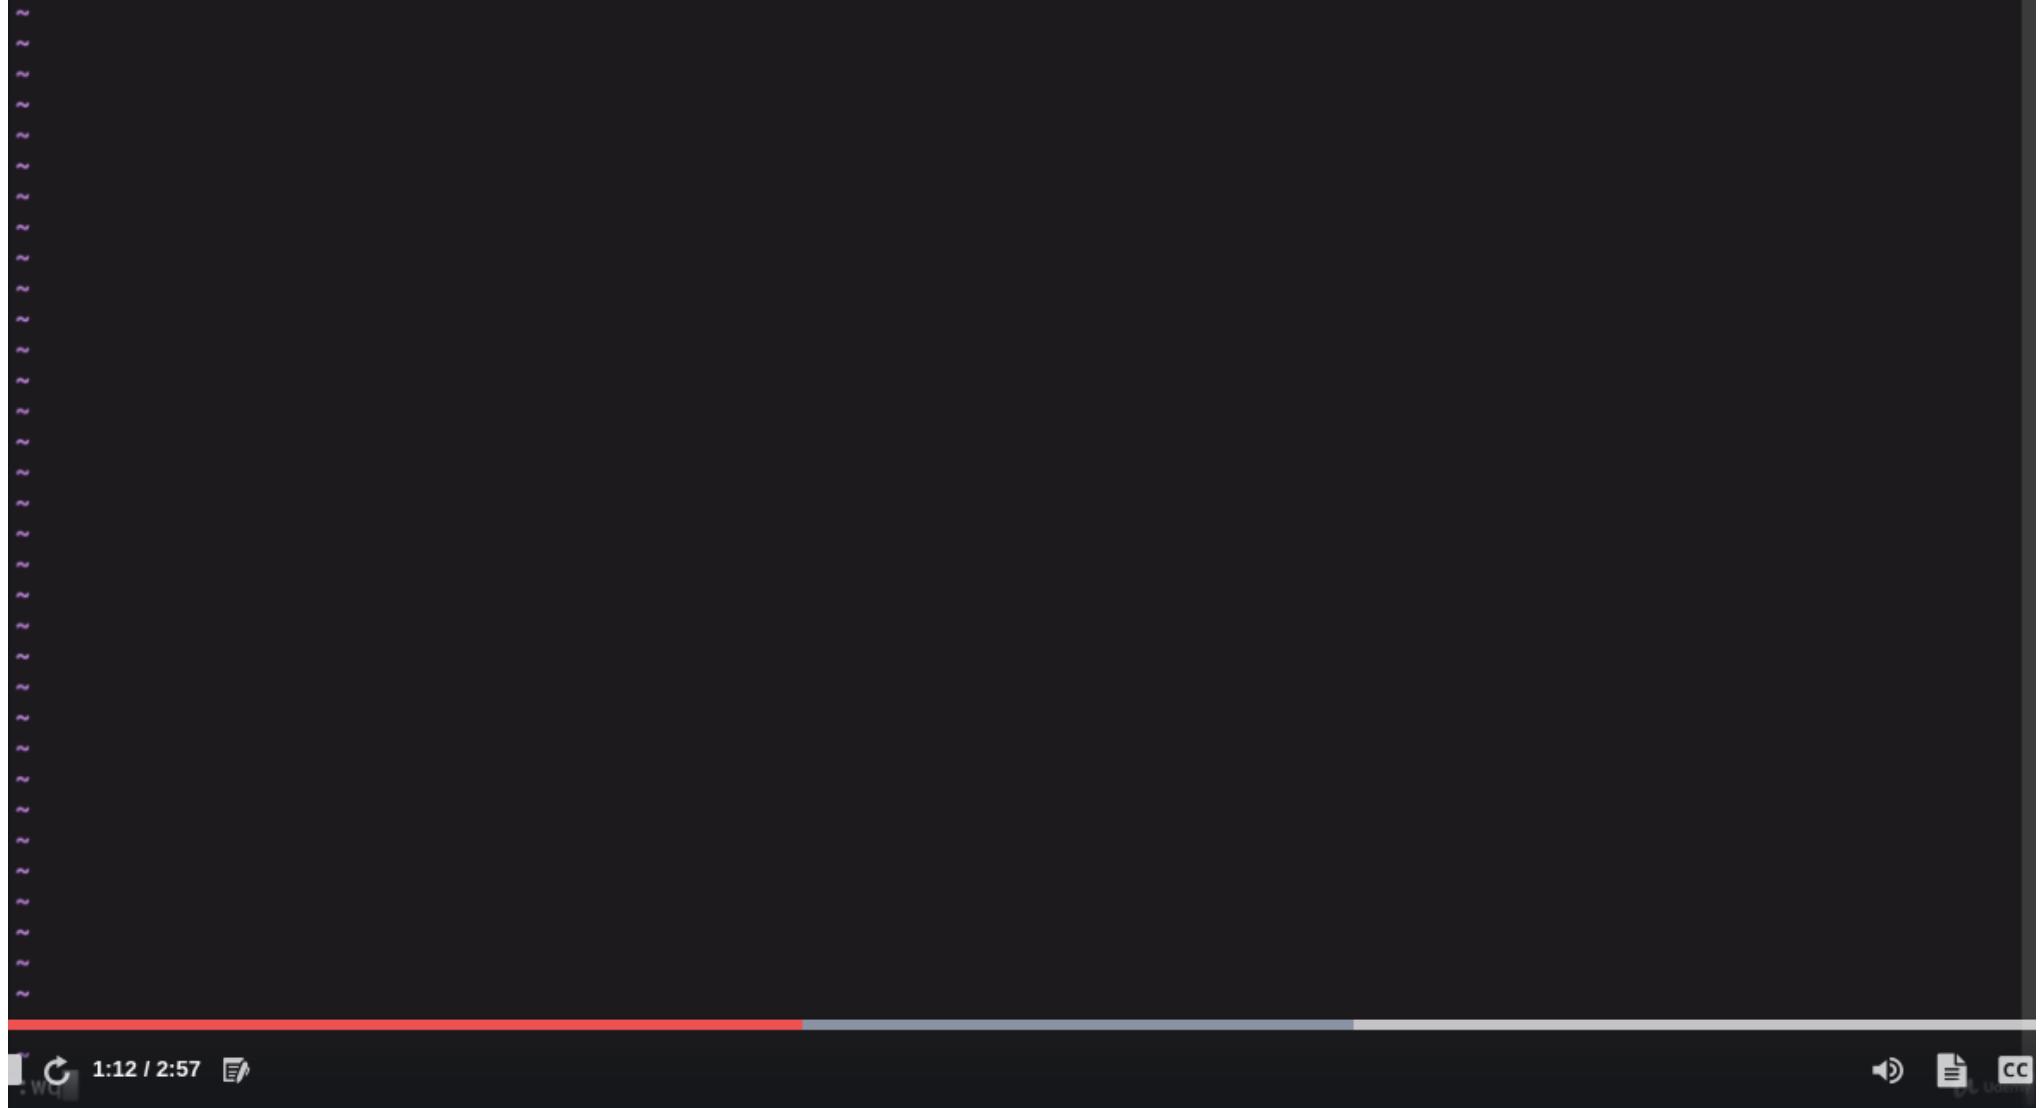

Turn off this advice by setting config variable advice.detachedHead to false

```
HEAD is now at 56a4814 Altering code-review.txt file
push-to-gerrit $
```

push-to-gerrit$
```

You are in 'detached HEAD' state. You can look around, make experimental changes and commit them, and you can discard any commits you make in this state without impacting any branches by switching back to a branch.

If you want to create a new branch to retain commits you create, you may do so (now or later) by using -c with the switch command. Example:

```
git switch -c <new-branch-name>
```

Or undo this operation with:

```
git switch -
```

Turn off this advice by setting config variable advice.detachedHead to false

```
HEAD is now at 56a4814 Altering code-review.txt file
push-to-gerrit $vi code-review.txt

The screenshot shows a Gerrit Code Review interface comparing two patches. The left pane shows Patchset 1 with one change: "Demo Gerrit Push for code review". The right pane shows Patchset 2 with one change: "Demo Gerrit Push for code review - second patch". The interface includes navigation links for previous, up, and next patches, as well as options to show blame, edit, or change the diff view (grid, list, or diff). The bottom status bar indicates the current patch is 2:48 / 2:57 and provides a link to the Gerrit Code Review version (3.2.3).

A screenshot of a web browser displaying the Gerrit Code Review interface. The URL is localhost/c/push-to-gerrit/+/6/2/code-review.txt. The main header shows 'Gerrit' and navigation links like 'CHANGES', 'YOUR', 'DOCUMENTATION', and 'BROWSE'. Below this, it says 'Altering code-review.txt file' with a checked checkbox for 'code-review.txt'. The left sidebar shows a file tree with '1 Demo Gerrit Push' selected. The right side shows a diff editor for '1 Demo Gerrit Push for code review - second patch'. The diff editor has a title bar 'File 1 Demo Gerrit Push for code review - second patch', a status bar 'DRAFT ⓘ', and a bottom row with 'RESOLVED' and 'CANCEL SAVE' buttons. A cursor is visible in the diff editor area. At the bottom, it says 'Powered by [Gerrit Code Review](#) (3.2.3)' and 'Press "?" for keyboard shortcuts'.

The screenshot shows a Gerrit Code Review interface for a file named 'code-review.txt'. The main content area displays two code snippets. The first snippet, labeled '1', contains the text 'Demo Gerrit Push'. The second snippet, labeled '2', contains the text 'Demo Gerrit Push for code review - second patch'. A tooltip is overlaid on the second snippet, providing a detailed view of its status: 'DRAFT' with a count of '1', a 'New comment' section, and a 'Resolved' checkbox. The timestamp '1:22 PM' is also visible. Below the code snippets are standard Gerrit navigation and action buttons: 'SHOW BLAME', 'EDIT', and 'Diff view' (with options for grid, list, code, and diff). At the bottom, there's a footer with the text 'Powered by [Gerrit Code Review](#) (3.2.3)' and a note to 'Press "?" for keyboard shortcuts'.

Press "?" for keyboard shortcuts

The screenshot shows a Gerrit Code Review interface. At the top, there's a header with tabs for 'code-review.txt', 'Changes', 'Your', 'Documentation', and 'Browse'. Below the header, it says 'Altering code-review.txt file' with a checked checkbox for 'code-review.txt'. On the right, there are links for 'File 2 of 2', 'Prev', 'Up', 'Next', 'Show Blame', 'Edit', 'Diff view', and settings. Underneath the header, there are buttons for 'Base', 'browse', 'Patchset 2', 'browse', 'DOWNLOAD', and 'Settings'. The main content area has two commit cards: '1 Demo Gerrit Push' and '1 Demo Gerrit Push for code review - second patch'. The second commit card has a timestamp of '1:22 PM'. In the center, a modal window titled 'File' is open, containing a 'DRAFT ①' section with a text input field containing 'Comment on file.', a 'Resolved' checkbox, and a 'SAVE' button. Below the modal, there's another commit card for '1 Demo Gerrit Push for code review - second patch' with a timestamp of '1:22 PM', a 'DRAFT ①' section, a 'New comment' link, a 'Resolved' checkbox, and 'DISCARD' and 'EDIT' buttons. At the bottom left, it says 'Powered by Gerrit Code Review (3.2.3)'. At the bottom right, it says 'Press "?" for keyboard shortcuts'.

A modal window is open, showing a review interface for a patch. It includes fields for 'Reviewers' and 'CC', a 'Comment on change' area, and a 'Preview formatting' checkbox. Below this is a 'Code-Review' rating scale from -2 to +2, with +2 highlighted. A checked checkbox for 'Publish 2 Drafts' is visible. Two draft comments are listed under 'Patchset 2': one for 'code-review.txt' and one for 'code-review.txt#1'. Each comment has 'DRAFT' status, a timestamp, a 'Comment on file.' section, a 'Resolved' checkbox, and 'DISCARD' and 'EDIT' buttons. At the bottom of the modal are 'Send reply' and 'CANCEL' buttons, with 'Send reply' being circled.

The screenshot shows a Gerrit Code Review interface for a pull request titled 'Demo Topics'. The pull request has a status of 'CODE-REVIEW+2' and is ready for 'REBASE'. The author is Stephan Folkes. The interface includes sections for basic metadata (Updated, Owner, Author, Committer, Assignee, Reviewers, CC), repository details (Repo | Branch), and a modal for adding topics. Below the main form, there's a 'Code-Review' section with no votes. The 'Files' tab shows a single file 'code-review.txt' with a patchset description. The 'Change Log' and 'Comment Threads' tabs are present, along with a filter for 'Only comments'. A footer indicates the system is powered by Gerrit Code Review (3.2.3) and provides keyboard shortcuts.

The screenshot shows a Gerrit pull request page for a commit with ID I708ddc66. The commit was pushed to the 'push-to-gerrit' repository's 'dev' branch at 8:54 PM. The author and committer are Stephan Folkes. The pull request has received a 'CODE-REVIEW+2' status. A modal window is open for adding a topic, with 'example-topic' entered. The 'Save' button is highlighted with a mouse cursor. Below the modal, there is a 'Code-Review' section showing 'No votes.' and a 'Files' section listing the commit message and 'code-review.txt'. The 'code-review.txt' file shows a green bar indicating no changes were made. At the bottom, there is a 'Change Log' section showing a single commit from Stephan Folkes.

Rebase

Rebase is a Git utility that specialises in integrating changes into a branch. It does this by creating new commits on the destination branch that will apply the changes.

Rebasing will help you to submit change reviews that cannot be merged due to conflicts.

Stephan Folkes Code-Review +2. Patchset 1 5:40 PM

Powered by Gerrit Code Review (3.2.3) Press "?" for keyboard shortcuts

The screenshot captures the Gerrit Code Review web interface. At the top, a header bar includes links for 'CHANGES', 'YOUR', 'DOCUMENTATION', and 'BROWSE'. A search bar and various navigation icons are also present. The main content area is titled 'Merge Conflict' and shows a specific change entry. This entry details the change's history: it was updated at 5:40 PM, the owner and author are Stephan Folkes, and the committer is Stephan Folkes. The assignee field is set to 'Set assignee...'. The review status is marked with a green checkmark and '+2' reviews from Stephan Folkes. Below this, a table lists the modified files ('code-review.txt') with their commit counts and size/delta information. The 'Change Log' tab is active, showing a single entry from Stephan Folkes indicating the upload of patch set 1 at 4:33 PM. The 'Comment Threads' tab is also visible. At the bottom, a footer notes the use of Gerrit Code Review version 3.2.3 and provides a key for keyboard shortcuts.

```

You are in 'detached HEAD' state. You can look around, make experimental changes and commit them, and you can discard any commits you make in this state without impacting any branches by switching back to a branch.

If you want to create a new branch to retain commits you create, you may do so (now or later) by using -c with the switch command. Example:

```
git switch -c <new-branch-name>
```

Or undo this operation with:

```
git switch -
```

Turn off this advice by setting config variable advice.detachedHead to false

```
HEAD is now at c4208e5 Change added to file to demo rebase
push-to-gerrit $

Cherry-pick

Cherry-pick is a git utility that allows you to pick out a specific commit reference and apply that it to the destination branch.

Cherry-picking will help you to merge a specific change reference, even if there is a dependency on an earlier change.
